
PEGASO VIÑAS VIEJAS / Cebreros

Finca la Piñonera
05260 Cebreros, Ávila

Pegaso Pizarra (2014)

The Pizarra vineyards are usually found on metamorphic soils. This type of soil is found at an altitude above 950 meters, up to 1,200 meters, mainly with an eastern orientation. The wines from here have a different expression, they are always complex, direct and profound.

REGION

Sierra de Gredos

VILLAGE

Cebreros (Ávila)

PLACES

Arrebatacapas, La Redonda, La Curva

VARIETIES

100% Garnacha

VITICULTURE

Traditional, organic. Old bushvines. Manual harvest in boxes.

ELABORATION AND AGING

Native yeasts. 24-30 months in barrels of 500 and 400 liters of French oak from different forests and origins.

SOILS

Slate soils. On metamorphic rock. Mainly oriented to the east at altitudes above 950 meters.

VINTAGE CHARACTERISTICS

The autumn of 2013 was dry and hot, giving way to a mild winter with average rainfall. Temperatures above average in spring caused an advance in plant development. The summer was warm in June and August, mild and rainier in July. In the end the fruit ripened at the usual dates and the vines yielded grapes of very good quality.
